## **DETAILED ACTION**

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

Species 1, as illustrated in figure 2A,

Species 2, as illustrated in figure 2B,

Species 3, as illustrated in figure 3,

Species 4, as illustrated in figure 4,

Species 5, as illustrated in figure 5,

Species 6, as illustrated in figure 6, and

Species 7, as illustrated in figure 7.

The species are independent or distinct because they contain different circuitry which means that there is different operation and driving of theses circuits. When comparing figure 2A with figure 2B, 2B contains 2 additional transistors (201 and 206) with the drain of 206 connected to the source of 201 compared to figure 2A. When comparing figure 2A with figure 3, 3 contains 2 additional transistors (301 and 305) with the source of 301 connected to the drain of 305. When comparing figure 2A with figure 4, 4 contains 2 additional transistors (402 and 408) with the drain of 402 connected to the source of 408. When comparing figure 2A with figure 5, 5 contains 2 additional transistors (501 and 507) with the sources connected to each other. When comparing figure 2A with figure 6, 6 contains 2 additional transistors (601 and 607) with the source of 601 connected to the gate and drain of 607. When comparing figure 2A with figure 7,

7 contains 3 additional transistors (701, 707, and 709) with the source of 701 connected to the gate of 707 and the drain and gate of 709.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
